About Oseki Mara Camp

"Oseki Mara Camp is a small off-the-grid community-based camp located less than 3 km away from the Masai Mara Gate, Sekenani.

Our camp is run by local Maasai peoples & one Dutchie called Anne together with her Maasai partner, the chief of Nkineji, Dennis Shinka Parmuat. We offer budget-friendly accommodation and local tours. We provide a range of options such as walking safaris, trekking, hiking, Maasai village visits, horseriding safaris, hot air balloon safaris, family safaris, photography safaris & more - all through the eyes of a local.

Our unique feature is our commitment to sustainable & responsible travel as we operate on green energy & (financially) support local initiatives such as a Maasai school & clinic. We're an excellent choice for travelers looking for an authentic African experience while supporting sustainable & responsible travel initiatives."

MAKE An IMPACT On Your Travels

Maasai culture meets nature & Wildlife

- Travel sustainable & support the locals through community based travel

MAKE AN IMPACT

Our authentic safaris take you beyond the well-trodden path, allowing you to experience the hidden wonders that only locals know. From encountering rare wildlife in their natural habitats to engaging with local communities, every moment is an opportunity for genuine connection and cultural exchange!

Why choose us?

Oseki is an excellent choice for travelers looking for an authentic African experience while supporting sustainable & responsible travel initiatives."

Besides supporting one of the local schools and clinics which are both projects we like to develop further through our initiative called: A Maasai Child Fund Organization - for more info: <https://maasaichildfund.org/>

One USD per person per night will be saved to donate to this initiative once you choose us for your next travels to Kenya

One USD will also go to the support of stray dogs & cats in the area. We are busy with setting up a project similar to the concept of "Just Dig It"

We aim to start the "Just Dig It" Project soon by digging some semi circular bunds to store water in our area. This way we help to fight global warming by re-greening Africa
